

DIRTY DOWN COSTUME CRAYONS

How To Use

www.dirtydown.co.uk

Costume Crayons work best at room temperature. Warm cold crayons before use by keeping in a pocket against the skin for 15 minutes. Turn screw until 10mm of crayon projects.

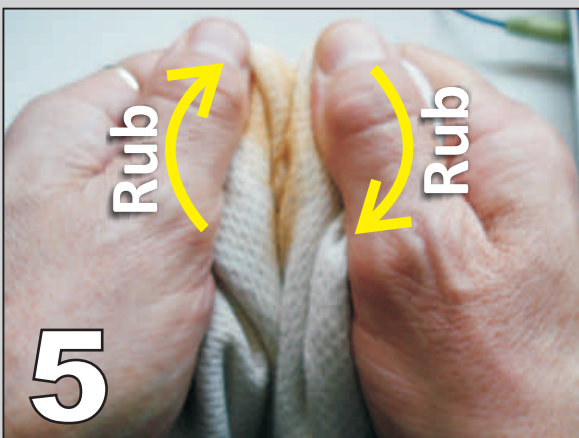

Hold Costume Crayon similar to a pen.

Hold crayon flat against the fabric. Apply in small areas at a time. Press gently for a less visible mark, or hard for a darker mark. Do not apply in long continuous lines. Use sparingly, a little at a time rather than a lot.

To smudge marks, rub-in each application using a dry or damp cotton cloth. Rubbing spreads the crayon mark and blurs the edges. The more the mark is rubbed, the fainter it gets.

You can also smudge crayon marks simply rubbing the fabric together.

Crayon mark after a moderate amount of rubbing. The edges are slightly smudged. To make the mark fainter, apply the Clear Crayon over the mark and rub again.
